

# Contents

## 06 SPARK

- 06 Top Projects**  
March is the month of making – and how!
- 18 Objet 3d'art**  
Go back to the future with a 3D-printed PCB
- 20 Meet the Maker: Matthew Little**  
Meet the captain of the good ship Curious Electric
- 26 Columns**  
Car hacking: it's nothing like *Fast & Furious 7*
- 28 Letters**  
The 1980s nostalgia corner revisits the Roland JUNO
- 30 Crowdfunding now**  
A new model for 3D printing
- 32 Space!**  
The maker kit powering NASA's latest Mars mission

## Cover Feature

**38**

**102**

## 37 LENS

- 38 Budget 3D printing**  
Just how low (in price) can you go?
- 52 How I Made: Pico video**  
Send video signals direct from a Raspberry Pi Pico
- 58 Interview: Geeky Faye Art**  
How to bring a classical sensibility to digital art
- 68 Improviser's Toolbox Zips**  
Flexible connectors – ideal making fodder!

## Tutorial

### Laser-cut printing

**80** Turn blocks of plywood into your own artisan printing press

**94**

**18**

**110**

## Direct from Shenzhen

### Logic analyser

**108** Monitor what's going in and out of your circuits

**20**

## Interview

### Geeky Faye Art

**58** Design aesthetic, the importance of accessibility, and 3D printing

## 73 FORGE

- 74 SoM Pico graphics**  
Get more performance out of the Pico Explorer
- 78 SoM Mini supercomputer**  
How many cores do you want?
- 80 Tutorial Laser-cut printing**  
Carve inky wood-blocks with computerised lasers
- 84 Tutorial Raspberry Pi**  
Preserve your peace with a Do Not Disturb sign
- 88 Tutorial FreeCAD**  
Create technical drawings with free software
- 94 Tutorial IoT**  
Connect little intelligent boxes over the internet

**52**

## 101 FIELD TEST

- 102 Best of Breed**  
Gadgets to monitor the growing green stuff
- 108 Direct from Shenzhen**  
Debug hardware with a cheap logic analyser
- 110 Review Pico RGB Keyboard Base**  
Add keys to your Pico without using up all the GPIOs
- 112 Review HiFive Inventor Coding Kit**  
Learn to program hardware with help from Doctor Who

**06**

Some of the tools and techniques shown in HackSpace Magazine are dangerous unless used with skill, experience and appropriate personal protection equipment. While we attempt to guide the reader, ultimately you are responsible for your own safety and understanding the limits of yourself and your equipment. HackSpace Magazine is intended for an adult audience and some projects may be dangerous for children. Raspberry Pi (Trading) Ltd does not accept responsibility for any injuries, damage to equipment, or costs incurred from projects, tutorials or suggestions in HackSpace Magazine. Laws and regulations covering many of the topics in HackSpace Magazine are different between countries, and are always subject to change. You are responsible for understanding the requirements in your jurisdiction and ensuring that you comply with them. Some manufacturers place limits on the use of their hardware which some projects or suggestions in HackSpace Magazine may go beyond. It is your responsibility to understand the manufacturer's limits.
