

Contents

06 SPARK

- 06 **Top Projects**
Some really nice things to grab your attention
- 18 **Objet 3d'art**
A 3D-printed robot that's smarter than we are
- 20 **Meet the Maker: Timon Skerutsch**
Turning a successful crowdfunder into a product
- 26 **Letters**
Your take on these pages

31 LENS

- 32 **Upcycle**
Turn junk into something you can admire/use/sell
- 44 **How I Made: Mechanical Pico keyboard**
Satisfying key presses with a Pico controller
- 50 **Interview: Michael Bretti**
Open-source space thrusters. We can't believe it either
- 58 **Improviser's Toolbox Tyres**
Turns out, rubber and steel are good for making things
- 62 **In the workshop Musical map**
Geography, meet music. Music, meet capacitive touch...

68

Cover Feature

Upcycle

Turn broken old bits of junk into useful, beautiful things

32

Tutorial

Laser cutter

88 Optics: lenses and lasers to carve through hot plywood

44

06

Tutorial FreeCAD

94 Design and build a robot out of immutable metal

67 FORGE

- 68 **SoM Pico Chord keyboard**
Turn key presses and code into letters and words
- 74 **SoM Sensory world**
Make a system to monitor your plants
- 78 **Tutorial PCBs**
Integrate buttons with PCBs
- 82 **Tutorial 74HC**
Back to basics with logic chips
- 88 **Tutorial Laser cutter**
Get the optics and laser right
- 94 **Tutorial FreeCAD**
Build a metal chassis for a robot rover

18

Interview

Michael Bretti

50 Open-source space hardware, developed for the community

62
